

Paper Slitter winder

Cardboard strips winder

Dedicated paper passage designed for the production of coreboard strips, where it is essential to minimize the distance between cutting and winding area.

- Reduced times for all automated processing cycles
- Web threading system from unwinder to winder
- Chucks with automatic positioning system
- Core introducer device with automatic positioning system
- Cutting unit with auto-positioning dust suction system
- Web cross cutting system
- Auto-spool expelling system on unwinder, with spool's Storage
- Scalink supervisor system

RAW MATERIAL	GRAMMAGE	WEB WIDTH
Card Board	200 ÷ 1.000 gr/m ²	2.000 ÷ 6.400 mm

Shafter slitter winder

Rewinder for offset paper, copy paper, kraft, cardboard, MG paper, naturals paper

- Max Speed 1800 m/min
- Width production range from 200 mm to 2.800 mm
- Unwinding station including roll's pick-up
- Automatic web edge guiding system

Multifunctional slitter winder

A unique special winder for Tissue and MG / light weight Kraft

- Design speed 1.800 m/min
- Special devices to work with different jumbo reel widths
- Two different and dedicated paper passage systems
- Two different and dedicated drives on the first unwinder
- Double control system: web lightening / web tension
- Double NIP control system for rider roll and chucks
- Auto-paper cross cut system with movable barrier
- Automatic shaft extractor system and shaft re-introduction
